

## Simple | Secure | Supported

# Industrial Modem Management Service

A comprehensive modem management service that enhances connectivity, strengthens multi-layer security, improves uptime, and reduces operational costs for remotely deployed connected devices. Powered by AquaPhoenix.

Flight simplifies and enhances connectivity for any deployed field device, controller, HMI or PLC. With 24/7 monitoring, advanced diagnostics, and seamless controller integration, Flight helps you manage your data with ease, improves uptime, and provides tangible return on investment.

### Key features include:

- Multi-carrier SIMS
- Enterprise-level security
- 2 Port & 4 Port Options
- No data overages
- Mobile app

### RELIABILITY

- Multi-carrier capability with automated failover for maximum uptime
- Intelligent uptime monitoring, alarming, and diagnostics
- High gain antennas

### SECURITY

- Private VPN connection
- Automated firmware and security patch updates
- Customizable access controls, IP whitelisting, and private IPs
- Access and event logs

### MOBILE APP

- Hierarchical and descriptive organization of deployed devices
- Easily and securely access any remote controller or connected device
- Signal strength, quality and uptime data, and information
